Polygraph Testing**

When Truth Matters

Central Polygraph Service Ltd. adheres to the highest levels of professionalism, integrity and industry standards. Examiners are state licensed, PCSOT certified, full members in good standing of professional national, international and state polygraph associations and undergo more than the minimum requirements established for continuing education on an annual basis.

Examinations are conducted with the newest state-of-the-art digital computerized polygraph systems utilizing the most advanced technologies available today – including Infrared Photoelectric Plethysmographs and Motion Activity Sensors – in addition to the standard Respiratory Activity Pneumographs, Cardiovascular Blood-Pressure Cuffs and Electrodermal Activity Sensors used for the monitoring of physiological activity in the autonomic nervous system. Examinations are digitally audio and video recorded for quality control assurances. Professional high-quality reports of the examination test results are produced with unique embedded security and identification authentication features. Confidentiality and privacy is strictly maintained.
